

FREE to BDLS members and non-members

Discover how artificial intelligence is transforming legal practice in this exclusive webinar for BDLS members. Baisics will showcase their advanced AI platform, designed to dramatically reduce the time and cost of legal document review. With features that outperform traditional tools - including automated lease analysis, intelligent document drafting, and real-time insights - this session will demonstrate how firms can boost productivity, accuracy and client service. Ideal for solicitors, practice managers, and anyone curious about the future of legal tech.

Baisics is an AI-powered legal software platform designed to streamline and automate key tasks in legal practice. Chris Wright of Baisics will deliver this short 30 minute presentation. <https://baisics.co.uk/services/>
